

**Rack:**  
**Nuts: 1 set**  
**Cams: 2 each, .5" to 3.5"**  
**(maybe an extra 1.5"-2")**  
**Slings: 10**  
**Rope: 70m mandatory**

**Rope: 70m mandatory**

1. Move up and right to roof. Awkward over roof. Continue past tree with slings and belay on ledge.
2. Watch for loose flakes at start of pitch.
3. Roof is awkward. At bolts, move right and stay low. Knots going straight up are off route. Takes all 70m to get to next belay
4. Set a belay just after wide layback or simo for about 30' to reach some ledges. High ledge has a block you can sling and some cam placements.
5. Belay is fixed pin. Pitch is not a full 70m. Belay at the start of the finger crack/layback that goes out left.
6. Cool boulder move to get out of the station. Place a big cam low before traverse for pro. Chimney/flare is easy and has pro. Exit out to the right and go up a slab to a big tree. Run the rope out a full 70m to this tree.

Descent: head up and right for a while to get to the Kat Walk. Follow the cairns back left and toward Higher. Gully has a couple of raps. One 70m cord is fine.
